

# THE IMS DIFFERENCE

Flexible Imaging Solutions from Here to Efficiency

IMS has over 30 years of experience transforming paper, film and underutilized document imaging processes into models of efficiency.

The Document Imaging Experts

## Document Capture

IMS professionals are experts at implementing and integrating document capture solutions that create efficiencies across departments and multi-site operations. We have partnered with the best in the industry to bring you the following solutions:

### Capture Pro

Scan and index documents from any scanner with complete integration to your document management system or Microsoft SharePoint. Bonus: OCR, barcode recognition and database look-up—and no click-charges, ever.

**System Compatible** with more than 160 scanner models

### FlexiCapture

When you need the most efficient form reading or full-text OCR solution on the market, ABBYY FlexiCapture eliminates the need for costly manual data entry.

### Patient Records

IMS can cure any healthcare organization of its paper addiction. Our turn-key solution from ChartCapture turns paper records into batch-processed, full-color images that are automatically sorted, stored and compatible with any EMR system.

## Scanners & Hardware

IMS offers a full spectrum of innovative, economical Kodak, Canon and Fujitsu scanners, at prices to rival any on-line retailer with a level of personalized service you won't find anywhere else. Buy scanners online and you buy alone. Buy from IMS and you get the technology solutions you need, and the service and support you deserve. *That's the IMS Advantage.*

## Scanner Implementation

Every IMS scanner comes with our exclusive Scanner Implementation Program (SIP).

- Pre-sale consultation and needs analysis
- Full scanner configuration support
- Free post-sale telephone support

## Integration & Training

Additionally, our Installation, Integration and Training Program (IIT) takes our innovative customer service even further:

- **Installation** – pre-sale product demo; load system drivers; device validation and optimization
- **Integration** – configure scanner with Document Capture systems; advanced indexing setup (OCR, bar codes); create task-specific scanning profiles; exception processing
- **Training** – comprehensive, on-site operator training including periodic maintenance and troubleshooting tips

## Document Conversion Services

Digitize your documents faster, more accurately and more cost-effectively. Our expertly trained staff along with our use of the latest imaging technologies enables IMS to generate cost and productivity savings for any sized document scanning project.

- No up-front costs, set up time, or long-term commitments
- Archival and day-forward scanning—print to digital, film to digital, digital to film
- Both on-site at your location and off-site at our secure document conversion facility

## Virtual Mailroom

IMS can collect, prep, scan, QA, and deliver your in-coming mail— via FTP or email— freeing capital and human resources for business-critical operations. *Savings you can count on every business day.*

## Microfilm & Microfiche Conversion

By installing an IMS scan on-demand film conversion solution with the option to store scanned film images permanently in your document management system, organizations can save thousands of dollars versus costly batch scanning. Want us to scan your film? We'll do that too.

## Archival Data Storage

Achieve long-term data archiving with ultra-redundant hard disk storage from Silent Cubes. The Fast LTA solution offers exceptional security against data loss, low energy and operating costs and is scalable into the petabyte realm.

## Cloud Document Management

By harnessing the cloud, you will achieve maximum efficiency at minimum cost. You will have secure, remote, multi-user access available anywhere, anytime via web browser—all without the capital expenditure and rollout/support headaches for IT.

## Service

Maximize system uptime. Minimize service and maintenance costs. IMS is an authorized Kodak and Canon Service Provider with an in-house team of expert technicians supplemented by a nationwide network of more than 1,200 certified engineers able to handle all your hardware service needs.

Our iServe Maintenance Solutions provide unmatched flexibility, convenience, and value.

### iServe-Value

Includes all *non-consumable parts, labor and travel, and pre-scheduled preventative maintenance visits*

### iServe-Plus

Includes all iServe-Value benefits plus *one year of all scanner consumables and cleaning supplies*

### iServe-Premier

Includes all iServe-Plus benefits, *with added consumable allowances for high-volume environments and on-going, preventative maintenance service*

## About IMS

IMS transforms any business process—whether paper, film or imaging-based—into a model of efficiency, especially for handling high-volume applications like invoices, claims, medical records, and loan documents. We integrate the optimum mix of scanners, software and storage with your document management, ERP or accounting system. We ensure that your existing imaging hardware and document management systems perform at peak capacity. Our customized iServe technical support guarantees optimum up-time and longevity for your hardware and software. With more than 30 years of experience, we serve companies small and large across the Midwest & Northeast, with special expertise in insurance, healthcare, banking, manufacturing, and government.

## Services

- Authorized Kodak & Canon Reseller
- Document Capture Solutions
- Systems Integration
- Document Conversion Services
- On-Demand Film-to-Digital Conversion
- Archival Data Storage
- Professional Services
- Equipment Maintenance & Support
